Petris recognized for exceptional growth with FastTech50 award

Petris demonstrates excellent annual revenue growth

HOUSTON, TX – November 26, 2007 – Petris was recognized as being one of the 50 fastest growing technology companies in Houston. In the annual survey conducted by The Houston Business Journal, Petris was ranked 32nd based on a 65.9% increase in annual revenue in 2006. Of more significance, Petris was ranked in the top ten for both 2006 revenue and for sales growth as measured in absolute dollars.

“Congratulations to all Petris employees for making this possible through their hard work,” said Jim Pritchett, president and CEO of Petris. “And a special thanks to our customers for their continued support of our products and solutions; because of them, we are looking forward to another year of outstanding growth.”

This award highlights Petris’ success as a software solution provider to the highly competitive oil and gas industry. This success confirms the acceptance, within the industry, of the Petris vision for universal access to data and applications any time, anywhere and in the required format.

The Fast Tech 50 Awards were presented to the 50 local high-tech businesses that experienced the greatest percentage of revenue growth in 2006. To qualify, companies must be headquartered in Houston and 51 percent of the company’s consolidated net revenues must be involved in the original manufacture, design, or development of technology products or services.

About Petris Technology, Inc.:

Founded in 1994, Petris provides practical, real-world IT-based solutions for energy clients leveraging its expertise in data management, application hosting, geospatial information systems (GIS) and professional services. Through a unique vendor-neutral approach and expertise in service-oriented architecture, Petris designs and deploys innovative technology that integrates data from diverse data stores to enable better decision making and application transparency. Taken together, Petris is leading the way into a new era in integration, data and application management. <http://www.petris.com>
