Significant Growth of Operations Center Customer Base Following Acquisition

Houston – June 12, 2008 – Petris is pleased to announce the significant growth of PetrisWINDS Operations Center’s customer base over the last twelve months with the addition of seven new customers.

The continued success of Operations Center, acquired by Petris in July 2007, validates the need for better management of data in the production and drilling operations arena, especially when considering the rise in energy prices and the growing regulatory requirements placed on operators. Operations Center is used by nearly fifty US oil and gas companies to manage the gathering and reporting of drilling, work-over and producing operations.

Bret Warner, Petris’ Product Manager for OpCenter, states “In these very robust times, we are pleased that operators continue to choose Operations Center as one of their strategic business systems. We have experienced approximately 20% growth in the product’s customer base in a year’s time. We are committed to the success of all of our customers and have mounted an aggressive campaign to enhance the product to provide further value to the market.”

Cano Petroleum, a publicly held producer based in Ft. Worth, Texas chose Operations Center because of its ability to gather and report producing volumes, well tests and a variety of other data from the field in near real-time. Cano’s Pat McKinney, SVP of Operations said “Operations Center has given us the ability to gather data from field operations faster than ever before and at a lower cost of implementation than other alternatives on the market.”

About Petris Technology, Inc.:

Founded in 1994, Petris provides practical, real-world IT-based solutions for energy clients leveraging its expertise in data management, application hosting, geospatial information systems (GIS) and professional services. Through a unique vendor-neutral approach and expertise in service-oriented architecture, Petris designs and deploys innovative technology that integrates data from diverse data stores to enable better decision making and application transparency. Taken together, Petris is leading the way into a new era in integration, data and application management. <http://www.petris.com>
