

## **Petris Announces Agreement between Petris and OpenSpirit Corporation**

### **Managers Can Now Rely on Superior Data Management, Interoperability and Workflow Integration**

**HOUSTON, TX, June 15, 2010** – Petris Technology, Inc. ([www.petris.com](http://www.petris.com)), a leading supplier of data management and geosciences applications to the global energy industry, is pleased to announce that they have joined the OpenSpirit Business Partner program to deliver additional data management, interoperability and workflow solutions. Adding the OpenSpirit solution to the Petris library of adaptors, provides Petris customers with the broadest range of adaptors for workflow integration in upstream E&P. OpenSpirit customers will now have access to the advanced data management capabilities provided by PetrisWINDS Enterprise (PWE), the most powerful web-based application available today for accessing and managing data across various data stores.

“The synergy from this agreement results in the best of both worlds - data interoperability and data management,” said John Wearing, Petris vice president of product management. “Managers will now have access to a far greater range of data for improved decision making and business intelligence.”

“We are pleased to have Petris join the OpenSpirit Business Partner program,” said Suri Bhat, Director of Product Marketing. “This expanded relationship will extend the data access options for users of the PWE solution, as well as add new application interoperability workflows for our mutual customers. From a single user environment, OpenSpirit clients will now have access to a data management platform that plugs into their existing infrastructure, allowing them search, find and broadcast data to the full portfolio of OpenSpirit-enabled applications.”

### **About Petris**

Petris is a leading supplier of practical data management solutions and geosciences applications to the global energy industry. Founded in 1994 and with over 500 clients throughout the world, Petris leverages its insight and knowledge to design technology that integrates information from diverse data stores including managerial, seismic, borehole, production, drilling, and pipeline to enable continually better decision making and application transparency.

### **About OpenSpirit**

The OpenSpirit Corporation, based near Houston in Stafford, Texas, began operations in July 2000 as an independent software company focused on providing integration solutions for upstream applications and data. The OpenSpirit application integration framework is installed worldwide in more than 450 sites and 300 companies. With a growing partner network of more than 55 partners with more than 40 OpenSpirit-enabled applications, OpenSpirit allows interoperability between multiple vendors' applications and data, enabling oil company end users in 65 countries to speed up critical workflows and enhance analysis in the geotechnical space.
