

Petris Announces the Release of PetrisWINDS Well Lifecycle Manager (WLM) *New data management solution for the entire well lifecycle*

HOUSTON, TX, May 25, 2010 – Petris Technology, Inc. (www.petris.com), a leading supplier of data management solutions and geosciences applications to the global energy industry, is pleased to announce the release of PetrisWINDS Well Lifecycle Manager (WLM), a powerful addition to PetrisWINDS Operations Management Suite, that gives easy access to a well's entire history—from prognosis and construction through abandonment. With WLM, oil and gas industry now has reliable data required to make quick, optimum drilling workflow decisions that maximize revenue and minimize costs, while avoiding costly errors in judgment due to insufficient information.

“Well Lifecycle Manager enables drilling departments to capture large amounts of accurate data both at the rigsite and in the office while providing processes that ensure the quality of the data,” said Edgard L. Castillo, Product Manager for Well Lifecycle Manager at Petris. “This gives managers the ability to make accurate knowledge-based decisions to optimize well construction and operations workflows.”

With WLM, Petris provides the energy industry with the most aggregate information—including any act associated with the well, involving its facility, inventory, budgeting, drilling, completions, operations, and maintenance—needed to manage the asset.

For further information about PetrisWINDS Well Lifecycle Manager, please see the brochure at http://www.petris.com/Products_&_Services/Operations_Management/WellLifecycleManager.asp.

About Petris

Petris is a leading supplier of practical data management solutions and geosciences applications to the global energy industry. Founded in 1994 and with over 500 clients throughout the world, Petris leverages its insight and knowledge to design technology that integrates information from diverse data stores including managerial, seismic, borehole, production, drilling, and pipeline to enable continually better decision making and application transparency.
