

A Complete Management Solution for the AFE Workflow Process

Petris has released its latest AFE (Authorization for Expenditure) Manager and has set a new standard for managing AFE's for the global oil and gas industry. Today's E&P companies require the use of practical and efficient systems to handle their individual work processes. AFE's are critical for cost control, project management, achieving planned ROI, and key internal and partner communications. Using spreadsheets can be time consuming, labor intensive, and lack proper audit controls.

Product of Choice

PetrisWINDS AFE Manager™ is feature rich and can be easily learned in a few hours. Users can create an AFE in minutes and electronically route it to each team member based on the company's approval process. In addition, reports on capital expenditures by working interests can be easily created and supporting documents can be attached to the AFE for review. AFE Manager fully reconciles with automated transfers in the enterprise general ledger system and other systems that contribute to and require its information and reports.

Benefits

- ▶ Configurable to your workflows, your cost codes, your ownership rules
- ▶ Transparent daily tracking of costs and variables
- ▶ Consistent practice between projects, divisions, and entities
- ▶ Timely approval using your email and communication systems
