

PetrisWINDS Enterprise – Configurations for Corporate Needs

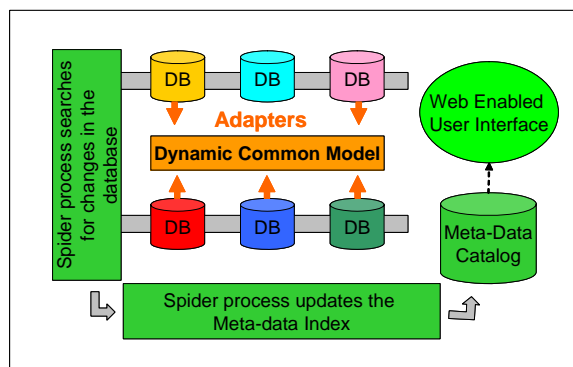

Petris offers three, upgradeable, versions or 'frameworks' of PetrisWINDS Enterprise (PWE), designed to suit a variety of needs and implementation strategies.

PetrisWINDS Enterprise Archive

Archive is geared for a single data store or archive system such as the PetrisWINDS Recall customer. Archive includes an adapter to search and move Recall data within itself or for delivery to the Desktop. No other adapters are supported. Archive also supports standard PetrisWINDS Enterprise User and optional Log Viewer and GIS Interfaces. Web Services and Relational Data Base (RDB) Access are provided through optional modules.

At A Glance: PetrisWINDS Enterprise

- ▶ Provides a fast, web-based, intuitive user interface for searching, retrieving and transferring data from and between disparate data sources.
- ▶ Optional GIS and/or Visualization of native data.
- ▶ Optional access to Tightly Coupled Catalog for Relational Database Access.
- ▶ Optional access to PetrisWINDS Enterprise Services using Web Services Module.

PetrisWINDS Enterprise WorkGroup & Advanced Versions

Workgroup provides all the capabilities of the PetrisWINDS Enterprise Archive version, and

the capacity to add up to three additional data stores/Adapters. Currently available Adapters include: OpenWorks, GeoFrame, Finder, Oilware, WLMS/PPDM, GeoLog, GoCAD, LogDB, LogTRAK, Kappa, SeisWorks, Charisma, Enigma, and Petra. A Data Auditor is also available.

The WorkGroup configuration is ideal for smaller companies or work teams where connectivity is needed for a limited number of applications. The Advanced version permits unlimited numbers of adapters and optionally includes Adapter Tool Kits.
