

Introduction to PetrisWINDS® Dashboard

Course Overview

PetrisWINDS Dashboard provides a fast, innovative way to analyze data visually. The use of this application requires neither technical skill nor IT expertise; learning to be a proficient user takes only a few minutes. Executives and project managers alike use Dashboard for rapid analysis of trends and patterns in the performance of corporate assets.

This brief introductory training course will review project examples, benefits, and features and functions in Dashboard, and will also address best practices for sharing project data through an Internet browser.

Who Should Attend

Exploration and production professionals, E&P and drilling managers, HSE and QA/QC staff, risk managers, project management office (PMO) members, consultants.

Prerequisites

None

Objectives

This course provides an introduction to PetrisWINDS Dashboard and the fundamentals of its use. After completing the course, students will understand:

- ▶ *The operational use of PetrisWINDS Dashboard*
- ▶ *How to access Dashboard features and functions*
- ▶ *How to implement "Performance maps" when using Dashboard*

Course Format

- ▶ *A review of Dashboard features and functions*
- ▶ *Interactive class exercises conducted as "How-to" sessions*
- ▶ *A review of "best practices" for using Dashboard operationally*
- ▶ *Short summaries from projects that have benefited from using Dashboard*
- ▶ *Definition of practical examples for each participant, relevant to Dashboard*
- ▶ *The course is given by a trained Petris software instructor*
- ▶ *The course will conclude with an open forum for general discussion*

Duration

The course will be conducted in a half-day session at the Petris training facilities.
